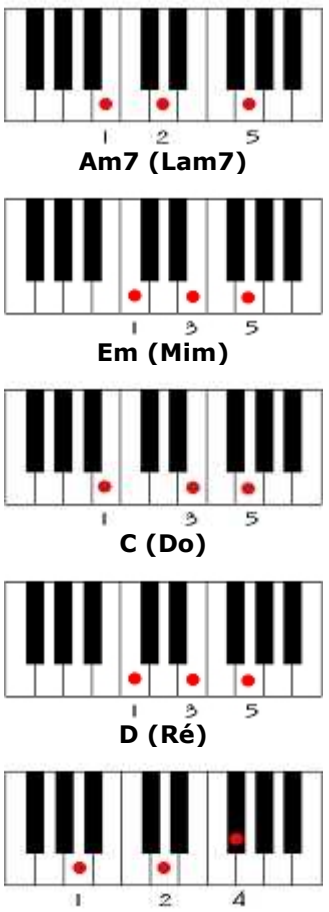
Accords :



```
                G                   Am7
1.  Do you ever feel like a plastic bag
Em                                  C
Drifiting through the wind, wanting to start again?
        G                   Am7
Do you ever feel, feel so paper-thin
Em                          C
Like a house of cards, one blow from caving in?
        G                   Am7
Do you ever feel, already buried deep;
Em                          C
Six feet under, screams but no-one seems to hear a thing?
G                           Am7
Do you know that there's still a chance for you
Em                          C
 'Cos there's a spark in you?

                        G       Am7       Em     C
Pre-ch:  You've just got to ignite the light, and let it shine
         G      Am7            Em     C
Just own the night, like the 4th of July

                            G           Am7
Chorus:  ('Cos) Baby you're a firework
                          Em                C
         Come on, show them what you're worth
                            G           Am7
         Make them go "O!"
                          Em                C
         As you shoot across the sky,
                       G            Am7
         Baby you're a firework
                          Em                C
         Come on let your colours burst
                       G       Am7
         Make them go "Oh!"
                                        Em        C
         You're gonna' leave before they know
```

2. You don't have to feel like a waste of space
You're original, cannot be replaced
If you only knew what the future holds
After a hurricane comes a rainbow
May be the reason why all the doors are closed
So you could open one that leads you to the perfect road
Like a lightning bolt your heart will glow
And when it's time you know . . .

```
Em                                                  C
Bridge:  Boom, boom, boom, even brighter than the moon, moon, moon
                                    G                                D
         It's always been inside of you, and now it's time to let it through
```
